

## Press Release

# Bertrandt acquires evopro systems engineering AG Expansion of the Range of Services in the Automotive Sector and Other Industries

**Ehningen, 23.10.2023 – With the acquisition of evopro systems engineering AG, Bertrandt is continuing to advance its corporate strategy by further expanding its range of services. In the future, the engineering service provider will therefore be able to offer even more comprehensive support for its customers in production services in an end-to-end process.**

With the acquisition of evopro systems engineering AG, Bertrandt is expanding its range of services in order to meet its customers' requirements in the field of production services even more efficiently, both in the automotive sector and in other industries.

“evopro is a technology service provider for industrial requirements and is engaged in the development of solutions in the production and development environment. evopro's around 100 employees have extensive expertise and experience in this area, which allows us to further expand our range of services and serve our customers' requirements in the best possible way,” said Markus Ruf, Member of the Management Board of Bertrandt AG.

The company evopro provides cross-technology solutions in automation technology and mechanical engineering, for example in the field of machine vision systems and robotics. In addition, evopro develops software solutions in the field of data acquisition and evaluation in the cloud. It also specializes in the development of individual and customer-specific software solutions.

evopro sees the acquisition by the Bertrandt Group as offering the best future perspectives for further expanding its business in the long term. No details are being revealed regarding the purchase price.

### About Bertrandt:

Through our development performance, we accelerate technological progress and make a relevant contribution to a sustainable future. We are an independent and international development service provider with many years of automotive expertise. With cross-industry know-how and a holistic understanding of systems and products, we create technological solutions along the entire value chain. We deal with a focus on trend topics such as digitalization, e-mobility and autonomous systems, mainly for the automotive, aviation and mechanical engineering sectors, and consistently facilitate the development of tailored solutions in these areas. We work on this every day – with around 14,000 employees at over 50 sites worldwide.

### About evopro:

evopro is specialized in the development and construction of equipment, electronics, and software in the automotive, electronics, pharmaceutical, and mechanical engineering sectors. The focus is on cross-technology solutions in the industrial environment with competences in test engineering, automation, machine vision systems, and software. evopro was founded in 2009 and was acquired by the three Members of the Management Board Bernhard Winderl, Michael Fleischmann, and Johannes Weingarten as part of a management buy-out in 2019.
